

ANAS HOSSAM

Front-End Engineer | React • Next.js • React Native

Egypt | +201144686309 | anas.hossam.work@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Computer Science graduate and Front-End Engineer with 3+ years of hands-on experience building scalable web and cross-platform mobile applications using React, Next.js, and React Native. Focused on clean architecture, software engineering principles, and production-ready solutions that balance performance, maintainability, and user experience. Currently seeking an opportunity with an ambitious company where I can contribute, grow, and deliver impactful digital products.

EDUCATION

Bachelor's Degree in Computer Science | New Cairo Academy (NCA), Egypt | V.Good | 2018 – 2022

EXPERIENCE

1. RAR-IT Design & Development LLC | Front-End Engineer | Remote | Apr 2025 – Jul 2026

- Built and enhanced scalable front-end features for production web applications using React, Next.js, and TypeScript.
- Translated business requirements into reusable components and polished user interfaces with strong attention to performance and maintainability, deliver reliable releases and improve the overall user experience.

2. Infinity Business Solution | React Native & React JS Developer | Remote | Nov 2023 – Apr 2025

- Developed cross-platform mobile and web features using React Native CLI, React.js, and Redux Toolkit.
- Focused on delivering smooth user journeys, code quality, and performance improvements in a fast-paced startup environment.

3. Intensive Code Camp | Front-End & Cross Platform Mobile Development | Trainee at Information Technology Institute (ITI), Aswan Branch | Mar 2023 – Jul 2023

PROJECTS

Trejars Website

Developed and enhanced a secure precious-metals platform for buying physical gold and silver, with a transparent and responsive user experience.

[Live Demo](#) | [Repository](#)

Lasscar Website

Contributed to a transportation platform for ride booking, airport trips, and delivery services with a focus on usability and scalable frontend implementation.

[Live Demo](#)

EQM Truck

Built and maintained a truck-booking experience that enables users to request pricing and reserve services online.

[Live Demo](#)

Estbn Mobile App

Developed a cross-platform mobile app connecting users with car maintenance services and spare parts, with geolocation and Firebase-powered workflows.
